GARDEN CREATIONS

Providing Complete Garden Management for Residential,
Strata and Commercial Facilities

"I can wholeheartedly trust that Urban Growth Gardening will attend to and carry out the best work for the Owners Corporation and a reasonable price. Their attention to detail is phenomenal and they get the job done right".

Nick A, Strata Manager

Meet the Urban Growth Gardening Team

Our Green Story

We are a team of passionate and motivated gardeners who started tending to plants and outdoor spaces on the Northern Beaches over 12 years ago. We love every aspect of designing, maintaining and building outdoor spaces. The biggest win for us, always, is seeing the results of our work and transforming gardens for people to truly enjoy. Gardening continues to be a rewarding, satisfying and creative experience and we firmly believe that a beautiful green space works wonders for the soul!

We are dedicated to nurturing our clients' gardens. Whether you're in need of an extra pair of hands, or require professional equipment and total garden management, we are here to help!

Strata Property Maintenance

Leave your gardens in our capable hands, and let us take the stress out of your strata property management. We provide on-time professional, comprehensive and reliable garden management services covering common garden areas in your strata property.

This includes lawn care and weeding, garden care such as pruning and reshaping shrubs, fertilising and mulching to ensure your gardens are always well presented to tenants, residents and visitors.

With our expert team of over 14 gardeners utilising the latest equipment, we also offer landscaping and other garden remediation work, including high-pressure cleaning of pavements and pathways around the strata property.

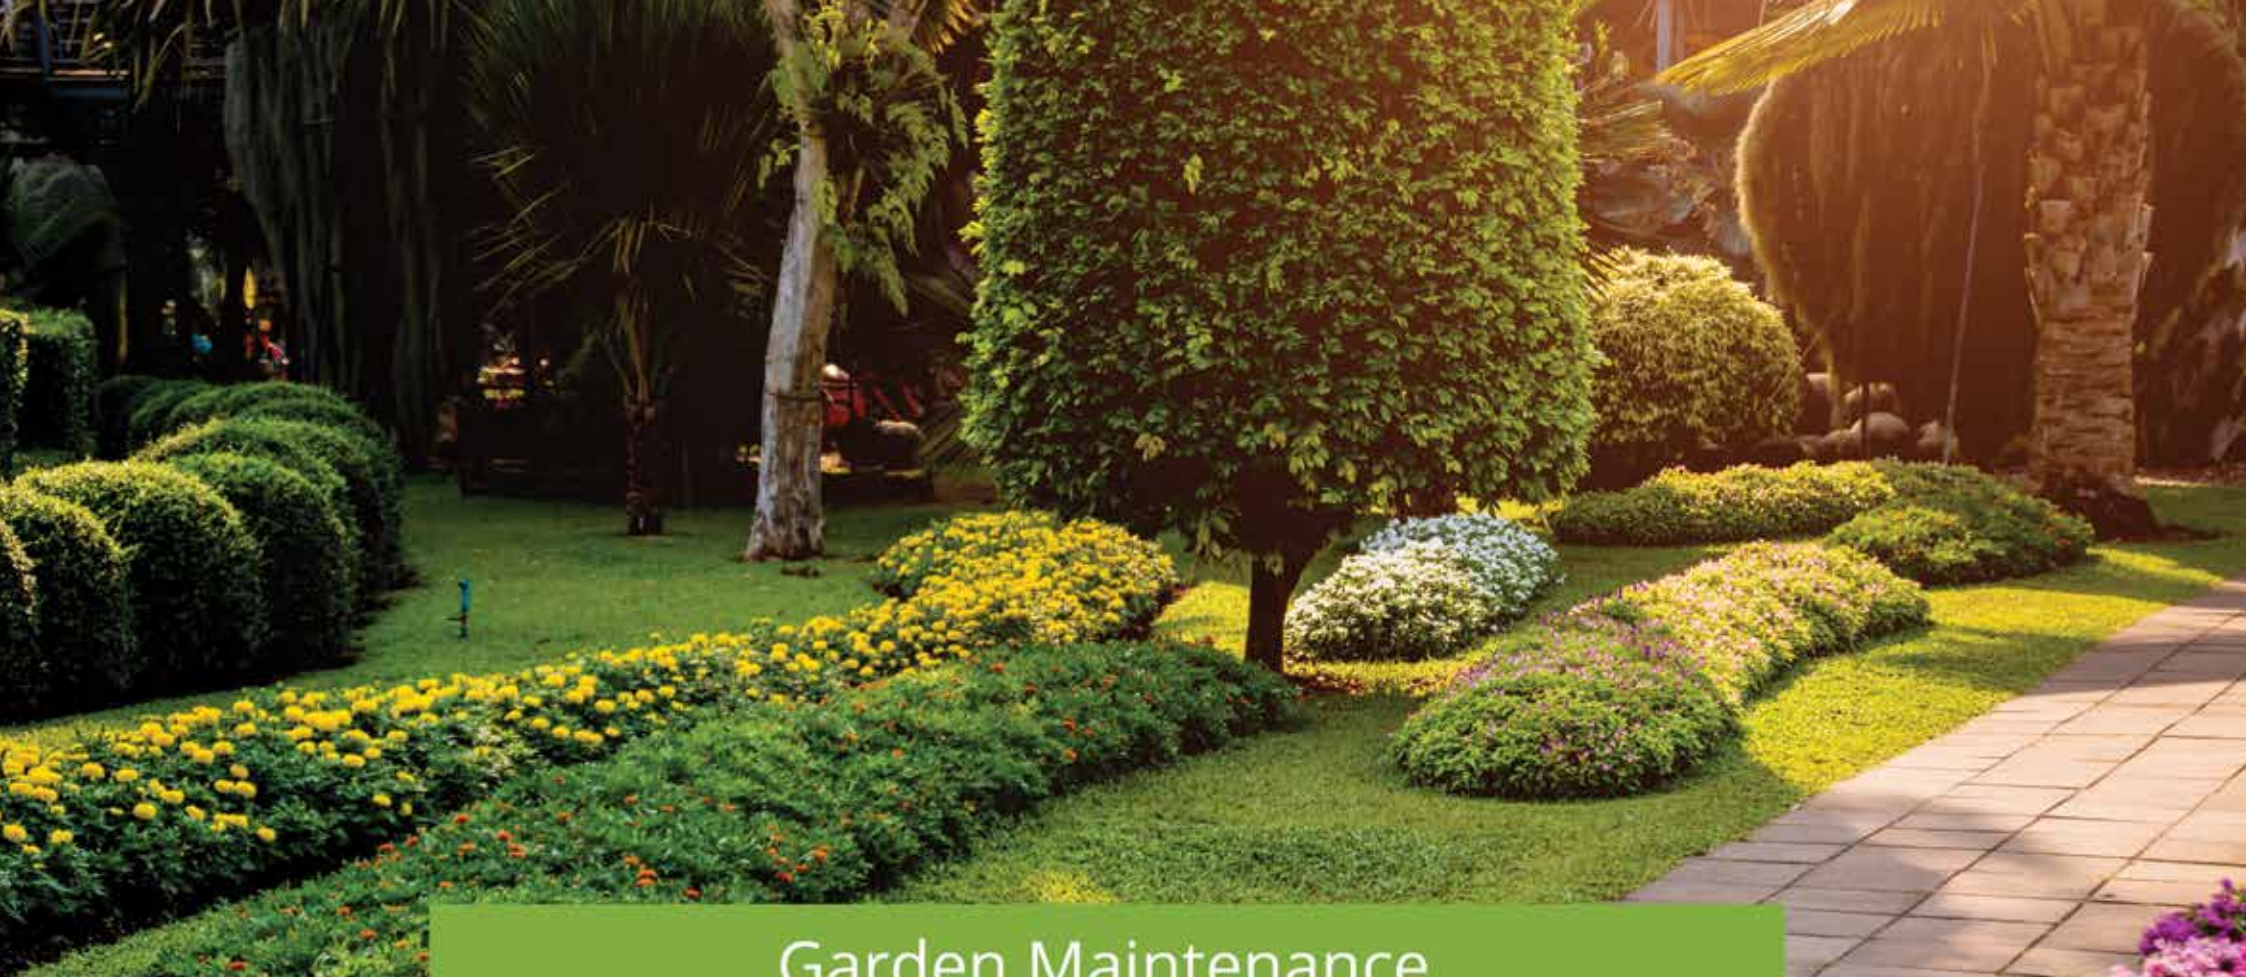

Commercial Facility Maintenance

When it comes to business, a professional appearance is essential, especially when clients visit your commercial facilities. Keep your commercial gardens and grounds in top-notch shape with our full garden maintenance service tailored to suit your facility. Whether it be a stand-alone office building or a large corporate site, our highly experienced and professional team can take care of your grounds with reliability and consistency.

Urban Growth Gardening is your one-stop-shop for total commercial garden care from:

- High-pressure cleaning of pathways
- Hedges and topiary maintenance
- Design consultation
- Supply and installation of customised plants and garden beds.

Garden Maintenance

Need a hand with your gardening, or don't have time to spend on the upkeep of your garden?

We can help. At Urban Growth Gardening, we are passionate about keeping your gardens beautiful, making them a place to truly enjoy.

We go by our motto: "A garden is your own idea of heaven, let us help create yours", so whether it be simple garden tasks that you don't have time to do, or if you're planning to refresh your outdoor space, our extensive range of services can help with everything garden related and provide you with the perfect solution.

Landscape Design

A beautiful garden creates an instant sense of calm - a haven where you can spend time and enjoy.

Urban Growth Gardening has years of experience designing unique and bespoke gardens.

From the initial idea consultation, concept design, layout planning to plant selection, supply sourcing and complete installation, we take care of your landscaping design project from start to finish.

Our Projects

Impressive Hedges

We pride ourselves on being experts at taking care of tall hedges. We care for hundreds of residential, commercial and strata managed properties across The Northern Beaches, North Sydney and North Shore... and boy - have we seen a hedge or two.

Our clients are always amazed by our capabilities and even the team at Urban Growth are still impressed and proud by the end result of a perfectly trimmed hedge.

We have the tallest ladders and the longest tools available on the market so we can tackle even the trickiest of tall hedges.

Don't have a hedge? We also install them and can provide regular visits to help them grow to be established, lush and tall.

“

Lucas and his team from Urban Growth have been our gardeners for over 10 years now. They have cared for our pines and various other elements of our garden, particularly hedges with great care and diligence. Urban Growth offers a wonderfully honest and mindful gardening service, we wouldn't hesitate to recommend them to anyone. They are truly the best.

Natalie Antolovich

Our Projects

Backyard Revamp

Our client had a backyard with no structure or purpose. The family hardly used it, and overtime the garden was so let go that it had become even more redundant.

To give this garden the revamp it needed we came up with a concept that included the addition of a paved area for outdoor gatherings, a designated mulched area for the trampoline and a path with gravel to avoid any dead patches of grass due to heavy traffic from the kids using the trampoline.

The transformation in the end was spectacular and the comments from the clients saying that they could now envisage using the area a lot more and enjoying it really made our day.

“

Lucas and the team at Urban Growth turned our backyard from a boring wasteland to a masterpiece. Lucas was very accommodating with design ideas and really listened to what was important to us as a family. The team were reliable, responsible and extremely hardworking. We absolutely love the new space and would highly recommend Lucas and the Urban Growth team. **Lucille Rappoport**

Our Projects

A New Pool and a Magical Garden

One of our clients decided to add a pool to their backyard. All the heavy digging machinery and chaos left by the builders wrecked the garden they had before.

With the builders almost completed with the pool works, our clients asked us to bring the surrounding garden back to life and include a few extras. We built a paved area for the kids to play basketball and a path to the cabana beside the pool.

The builders finished their work, and voila, we managed to finish the garden renovations one day later. The family was waiting on the back verandah to start using their new backyard the minute we finished, and the kids were over the moon with their new pool and backyard area.

“

The Urban Growth team landscaped our garden after we put in a pool. They were fantastic in all areas including design, paving, privacy screens, plant selection, lawn and so much more. They were on time, reliable, professional, polite and delivered an amazing outcome we are thrilled with. The team were flexible fitting in with our timeframes and delivered highest quality. **Jason Martinez**

Our Projects

Reclaimed Outdoor Living

Our client's house was built when dedicated, and functional outdoor living spaces were not a priority. Consequently, our client had no room for entertaining or to enjoy a BBQ with family and friends.

Consulting with our client, we understood what she wanted to achieve and came up with a solution.

By clever expansion of the paved area, Urban Growth could fit a large table and chairs and BBQ but still leave ample lawn space for the children to play on.

“

Lucas and his team are great. From the initial consultation Lucas grasped the concept that we had for our garden overhaul and turned our sketches into a design we are thrilled with. The work included replacing a retaining wall, paving, drainage and planting, all of which have transformed our garden and the way we use it. Lucas was flexible as we changed our minds about various elements along the way – he has a great rapport with his team and they work really hard. We will continue to use Urban Growth for garden maintenance and other landscaping and would recommend Lucas and the team to others.

Our Projects

A new place in the sun

Our clients had a backyard that was impractical. With such a great outlook from their yard, they wanted a place in the sun where they could relax and enjoy their garden. They reached out to Urban Growth to help them achieve this.

We devised a solution that embraced the sloped landscape. We constructed two levelled terraced areas, perfect for placing an outdoor lounge set where the family could sit and look at their beautiful surroundings.

Because of the access of the yard, all of the digging had to be done by hand! The Urban Growth team moved over 20 tons of soil! But the hard work was worth it and the result was a fantastic transformation.

“

Lucas and his team provided really great advice, design and planning for our garden landscaping, right through to outstanding execution of the project. Could not be happier with the result, our garden has been completely transformed. Highly professional team and strong work ethic, you won't regret engaging Urban Growth!
